

IRPE Corner

June 2013

In this debut issue of IRPE Corner, data for the Retention of Probation Students is presented for five years. Retention rates from Fall to Spring and from Fall to the following Fall are provided for 2007FL to 2011FL.

Noteworthy observation: When looking at Fall to the following Fall, suspended students are retained at a higher rate than students on probation for four out of the five years under review.
