

Fall-to-Spring and Fall-to-Fall Retention – 2010FL to 2015FL First Time in College Cohorts

District-wide and Campus Level

Summary:

Fall-to-Spring (FL-to-SP) and Fall-to-Fall (FL-to-FL) retention rates for the 2010FL, 2011FL, 2012FL, 2013FL, 2014FL, and 2015FL first time in college (FTIC) cohorts are presented in this report. At the District level, the FL-to-FL retention rate for FTIC students as well as degree-seeking FTIC students has increased.

Definitions:

FTIC: A student who is first time in college, not in dual credit, and not auditing all their courses.

ATD FTIC: A student who is first time in college, [degree-seeking](#), not in dual credit, and not auditing all their courses.

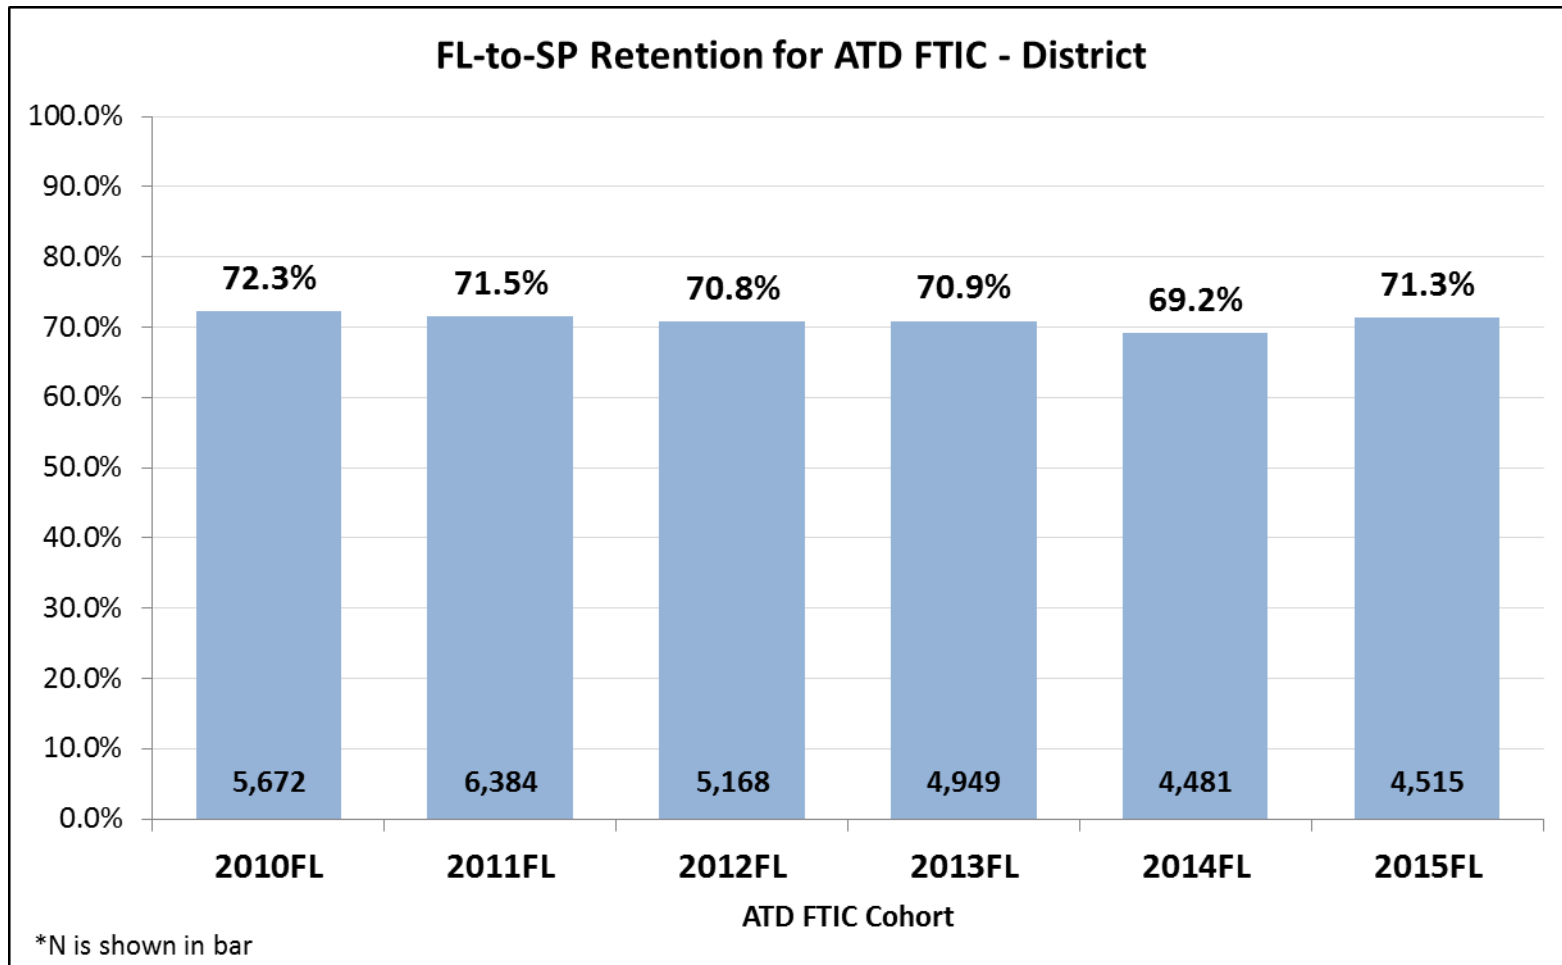

FL-to-SP retention: A student who is FTIC in the fall term and returns the following **spring** term is considered retained.

FL-to-FL retention: A student who is FTIC in the fall term and returns the following **fall** term is considered retained.

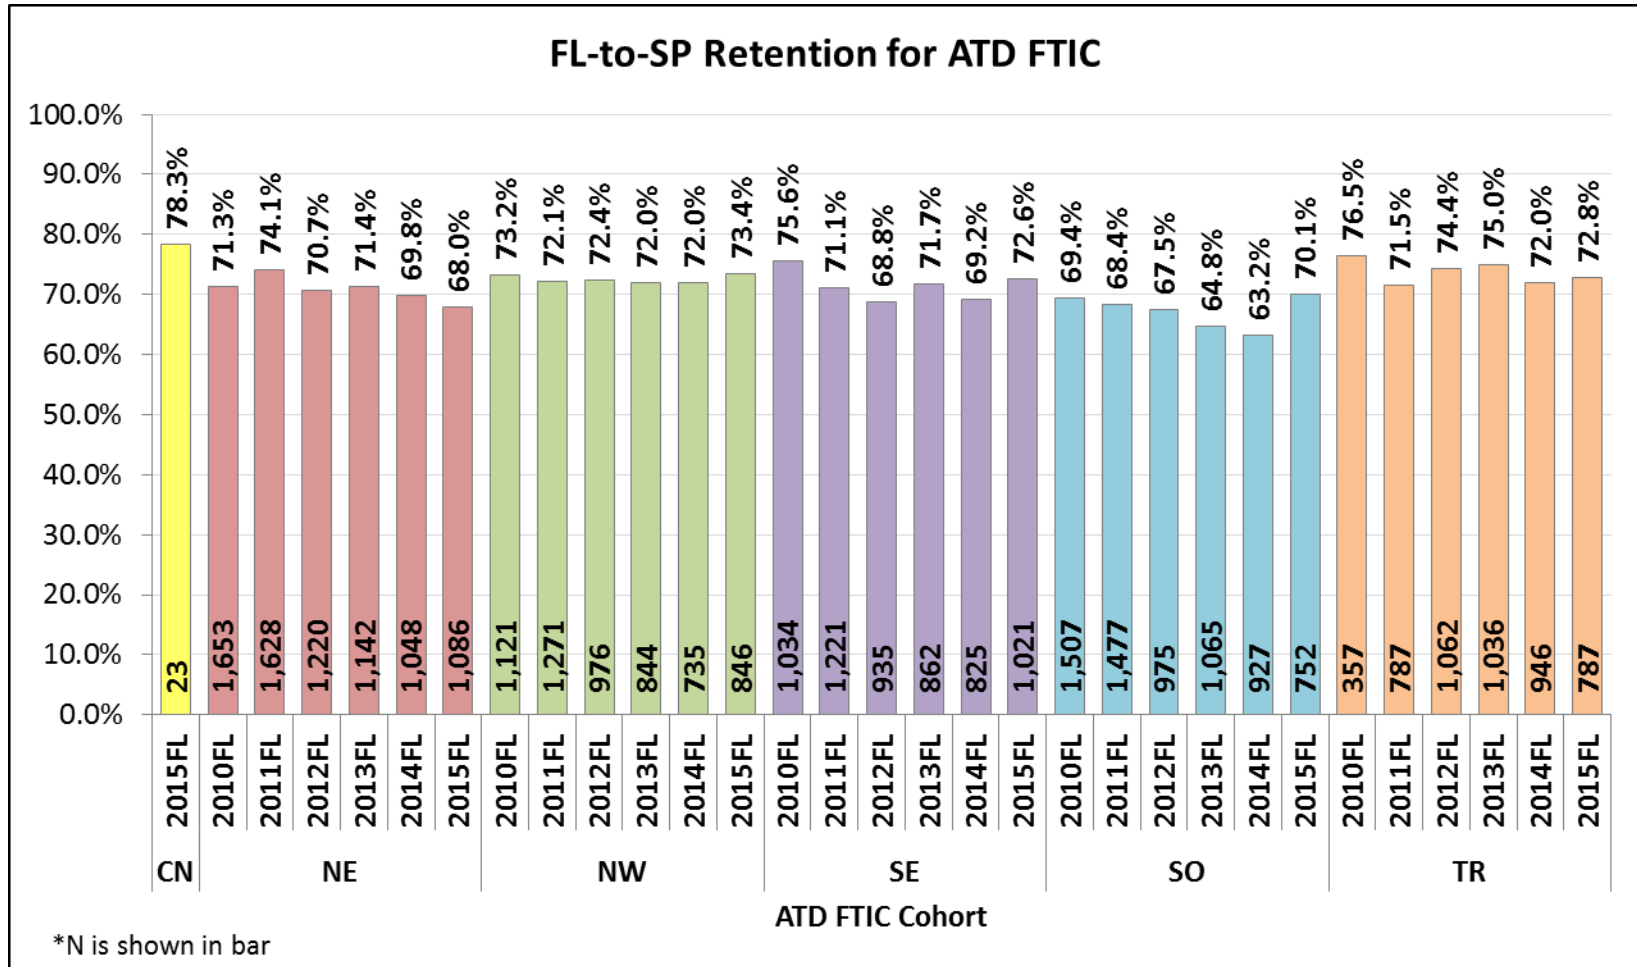

Data Notes:

District Data (page 1): As an example, there were 5,672 students in the 2010FL ATD FTIC cohort. In other words, on census day there were 5,672 degree-seeking students who were first time in college in 2010FL. Of these students, 72.3% were enrolled at TCCD on the 2011SP census day.

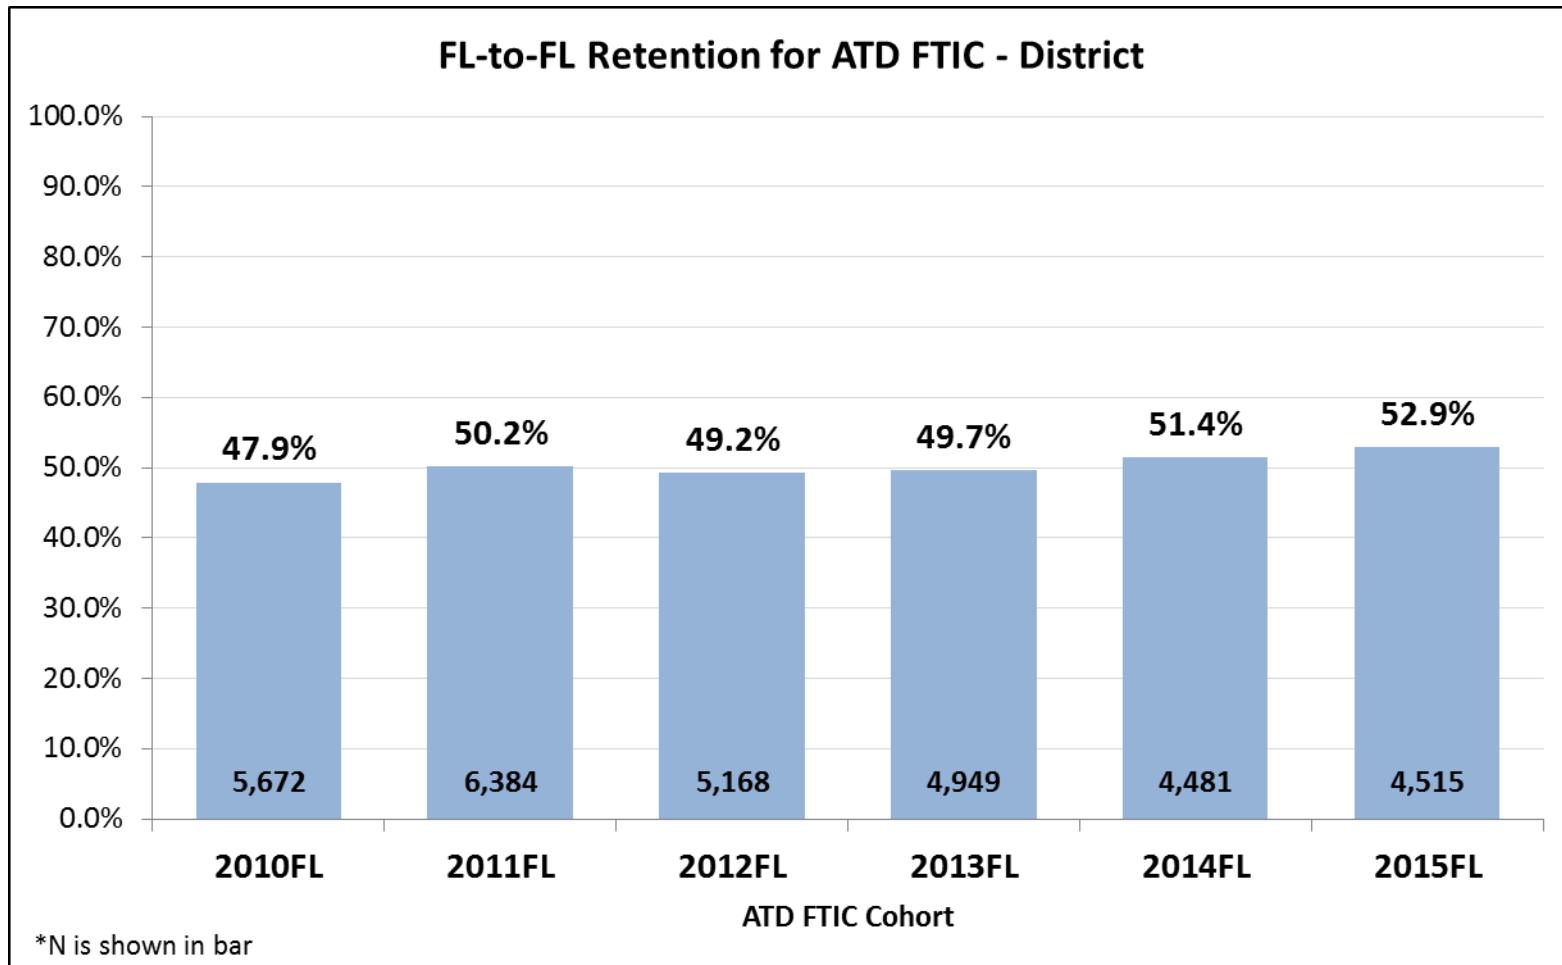

Campus Data (rows 2 to 7 of Table): As an example, there were 1,653 students in the 2010FL NE ATD FTIC cohort. In other words, on census day there were 1,653 degree-seeking students who were first time in college in 2010FL and had Northeast as their home campus. Of these students, 71.3% were enrolled at TCCD on the 2011SP census day. Note that campus was established by the student's home location in their first fall term, and if the student returned to any campus the following spring, the student was considered retained to the following spring. Similarly, if the student returned to any campus the following fall, the student was considered retained to the following fall.
