

Institutional Review Board Proposal Revisions Checklist

YES	NO	Proposal Revisions Components
		A summary page has been provided listing the revisions requested by the IRB, including page numbers where those revisions can be found.
		All revisions have been addressed. If not, a justification has been provided discussing why it is appropriate that the revision cannot or will not be addressed.
		Any and all revisions and/or changes made in the documentation are highlighted (in yellow for example).
		Any changes made to the proposal have been changed throughout the document such that the language is consistent.
		All original documents have been included in the resubmission (barring any necessary changes made).
		The resubmission of the proposal has been returned in a timely manner.
		I am aware that the TCCD IRB does not allow more than 4 total submissions of any proposal, including resubmissions.

If there was a **NO** response to any of the above questions, the proposal must be revised accordingly unless the investigator can satisfactorily justify why it is appropriate as submitted.
